## Profile

Results-oriented product designer with 15+ years crafting intuitive, scalable experiences for enterprise, B2B, and SaaS products. Specializes in translating complex concepts into usable solutions, from initial 0 → 1 launches to optimizing existing user flows, with a strong focus on collaborative partnerships with product and engineering teams.

## Key Achievements

- Accelerated go-to-market for an AI-driven enterprise IT platform, turning scattered V0 prototypes into a cohesive UX.
- Took a hosting startup from concept to MVP, with a tokenized Figma design system adopted across engineering.
- Unified web and mobile for a B2B community platform, while cutting a 1,500+ bug backlog to under 100.
- Built and mentored design teams, and helped clients secure £1M+ in pre-seed funding through product vision and pitch work.

## Skills

Design leadership · Team building · Design systems · Figma · Tokens & components · Complex enterprise UX · Multi-surface products · 0 → 1 product design · UX strategy · Research & discovery · AI-assisted workflows · Data-informed design · Experimentation · Cross-functional collaboration · Design ops

## Work Experience

|                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
|---------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 07/2025 – 03/2026<br>London, UK | <b>Principal Product Designer</b><br>Conduct <ul style="list-style-type: none"><li>• Accelerated go-to-market for an enterprise SAP/ERP intelligence platform by unifying scattered V0 prototypes into one coherent end-to-end UX.</li><li>• Designed an AI assistant that helps IT teams understand and modernise complex legacy ERP environments.</li><li>• Turned large-scale enterprise IT documentation into a navigable, searchable interface.</li></ul>                                                                |
| 03/2024 – 06/2025<br>Remote     | <b>Head of Product Design</b><br>Rapyd Cloud <ul style="list-style-type: none"><li>• Drove first-year expansion into new market verticals by defining and executing a company-wide design strategy.</li><li>• Reached full engineering adoption of the Figma design system, tightening UI consistency and streamlining onboarding.</li><li>• Embedded design into strategic planning with product and executive leadership, helping shift the team to a bi-weekly release cycle.</li></ul>                                    |
| 06/2023 – 03/2024<br>Remote     | <b>Principal Product Designer</b><br>Rapyd Cloud <ul style="list-style-type: none"><li>• Shipped the core hosting product on time by aligning experiences to platform architecture and technical constraints.</li><li>• Simplified complex infrastructure into a single, navigable hosting dashboard, cutting onboarding time and UI complexity.</li><li>• Built a modular Figma design system (theme tokens, light/dark modes, custom icons, reusable components) that lifted visual consistency and dev velocity.</li></ul> |
| 01/2021 – 03/2024<br>Remote     | <b>Principle Product Designer &amp; Strategist</b><br>BuddyBoss <ul style="list-style-type: none"><li>• Led product design and strategy across a web and mobile community platform, improving consistency and team efficiency.</li></ul>                                                                                                                                                                                                                                                                                      |

| 12/2020 – 07/2023<br>Remote                 | <ul style="list-style-type: none"><li>• Built a shared Figma design system spanning web and mobile, unifying the product suite under one tokenized design language.</li><li>• Shaped roadmaps around user needs and business goals, accelerating release cycles and lifting engagement.</li></ul> <p><b>Product Manager</b><br/><b>BuddyBoss</b></p> <ul style="list-style-type: none"><li>• Cut the bug backlog from 1,500+ to under 100, materially improving product stability.</li><li>• Accelerated release cadence from monthly to bi-weekly, improving cross-team coordination and backlog hygiene.</li><li>• Owned the product lifecycle from ideation to release across feature delivery and platform improvements.</li></ul> |
| 01/2019 – 12/2020<br>London, United Kingdom | <p><b>Product Designer</b><br/><b>Soccer Mindset Academy</b></p> <ul style="list-style-type: none"><li>• Designed and launched the mobile app, contributing to a successful acquisition in 2019.</li><li>• Co-created the Mindform Methodology and Soccer Mindset Challenge for young players.</li><li>• Produced 70+ days of mindset training video and audio exercises.</li></ul>                                                                                                                                                                                                                                                                                                                                                    |
| 03/2007 – 12/2018<br>Remote                 | <p><b>Product Designer &amp; Consultant</b><br/><b>Freelance</b></p> <ul style="list-style-type: none"><li>• Led product design and strategy for 100+ digital products and online brands across industries.</li><li>• Helped clients secure £1M+ in pre-seed funding through pitch materials and product vision.</li><li>• Supported startups with MVP definition, launch strategy, and team building.</li></ul>                                                                                                                                                                                                                                                                                                                       |

## Technical Proficiency

---

I build and iterate on product features independently using AI-assisted workflows, with a working understanding of:

- **HTML, CSS, JavaScript** – front-end code, standards, and responsive patterns.
- **React, Next.js, TypeScript** – component architecture, state management, developer experience.
- **GraphQL & REST APIs** – schema design, query logic, integration flows.
- **Native app signing & deployment** – building, signing, and publishing iOS and Android apps via the App Store and Google Play Console.
- **Data pipelines & warehouses** – partnering with data teams to structure event pipelines and surface insights.
- **LLMs & AI systems** – strong technical understanding of LLMs and AI-driven product architectures.
- **Enterprise IT stacks** – ERP platforms and legacy systems.
- **Product metrics & analytics** – implementing analytics tooling to define and track key product metrics.
